Product Manager

edical Communications for

ombat Casualty Care (MC4)

MC4 Mission

- MC4 Program is the single Information Management/ Information Technology System for automation and digitization efforts for the deployable United States Army Medical Department (AMEDD) forces.
- Army-specific automation hardware and software to support fielding of the Joint Theater Medical Information Program (TMIP) based on standards established by the Assistant Secretary of Defense for Health Affairs.
- MC4 Program integrates and links the medical automation information management solutions horizontally and vertically into the Army C2, CSS and communications architectures.
- MC4 Program addresses all other AMEDD unique requirements.
